

## COVID-19-Related Stigma Scale for Health Care Workers (CSS-HCWs)

|    |  | not at all agree | not agree | not very much agree | somewhat agree | agree | very much agree |
|----|--|------------------|-----------|---------------------|----------------|-------|-----------------|
| 1  | My family would treat me as dirty if I have close contact with COVID-19 patients.  | 1                | 2         | 3                   | 4              | 5     | 6               |
| 2  | Other health care workers would treat me as dirty if I have close contact with COVID-19 patients.                              | 1                | 2         | 3                   | 4              | 5     | 6               |
| 3  | My family would avoid me if I have close contact with COVID-19 patients.   | 1                | 2         | 3                   | 4              | 5     | 6               |
| 4  | I feel guilty if I have had close contact with COVID-19 patients.  | 1                | 2         | 3                   | 4              | 5     | 6               |
| 5  | Other health care workers would avoid me if I have close contact with COVID-19 patients.                                       | 1                | 2         | 3                   | 4              | 5     | 6               |
| 6  | If health care workers get infected with COVID-19, it is no surprise that they are criticized by the others.                   | 1                | 2         | 3                   | 4              | 5     | 6               |
| 7  | I find myself feeling dirty if I have had close contact with COVID-19 patients.  | 1                | 2         | 3                   | 4              | 5     | 6               |
| 8  | People treat me as a bad person if I have close contact with COVID-19 patients.  | 1                | 2         | 3                   | 4              | 5     | 6               |
| 9  | People would treat me as dirty if I have close contact with COVID-19 patients.   | 1                | 2         | 3                   | 4              | 5     | 6               |
| 10 | I should hide the fact that I am a health care worker.   | 1                | 2         | 3                   | 4              | 5     | 6               |
| 11 | It is best to hide the fact that I have had close contact with COVID-19 patients.  | 1                | 2         | 3                   | 4              | 5     | 6               |
| 12 | I ask my family to hide the fact that I am a health care worker.   | 1                | 2         | 3                   | 4              | 5     | 6               |
| 13 | It is dangerous to tell people that you have had contact with COVID-19 patients.   | 1                | 2         | 3                   | 4              | 5     | 6               |
| 14 | It is better not to meet with people around you so that they do not ask whether you have had close contact                     | 1                | 2         | 3                   | 4              | 5     | 6               |
| 15 | The families of health care workers who have close contact with COVID-19 patients will be treated unfairly at work and school. | 1                | 2         | 3                   | 4              | 5     | 6               |
| 16 | The families of health care workers who have close contact with COVID-19 patients will be avoided by people.                   | 1                | 2         | 3                   | 4              | 5     | 6               |
| 17 | The families of health care workers who have close contact with COVID-19 patients will be treated as an infected person.       | 1                | 2         | 3                   | 4              | 5     | 6               |
| 18 | The families of health care workers who have close contact with COVID-19 patients will interfere with work and schoolwork.     | 1                | 2         | 3                   | 4              | 5     | 6               |
